

Advanced Start-Up & Maintenance for Salt Water Pools

About Us

Pristiva is a subsidiary of Compass Minerals and is an innovative company solely focused on the North American salt water pool market. Pristiva products, available only through pool professionals, are the only products specifically designed to comprehensively meet the unique needs of salt water pools.

Compass Minerals, based in the Kansas City metropolitan area, is a leading producer of minerals, including salt, sulfate of potash specialty fertilizer and magnesium chloride. The company provides highway deicing salt to customers in North America and the United Kingdom and specialty fertilizer to growers worldwide. Compass Minerals also produces consumer deicing and water conditioning products, ingredients used in consumer and commercial foods, and other mineral-based products for consumer, agricultural and industrial applications. Compass Minerals also provides records management services to businesses throughout the United Kingdom. Though the company's history stretches back as far as 1844, Compass Minerals became a public company following its initial public offering in December 2003.

Our stock trades on the New York Stock Exchange under the symbol CMP. Our corporate website is: <http://www.compassminerals.com/>
